

**Duration:** 1 Day

**Prerequisites:** Before attending the course the user should have attended the BIM implementation training.

**Course Outline:** Essential course for supply chain who will be providing data to a BIM project and principal contractors who will need to assess and summarise in the Supply Chain Capability Summary (SCCS) as part of the tender process. This course will detail how to complete the supply chain assessment forms and summarise the information.

**Course Format:** The course throughout the day will develop the Supply Chain Assessment Forms and completion of the Supply Chain Capability Summary documentation reviewing a worked example.

### Content

1. Strategy behind Supply Chain Summary Forms and capability summary.
2. Risks associated with not assessing supply chain.
3. Key factors that will help supply chain develop skills to be BIM capable.
4. SCCS as part of the Project Implementation Plan (PIP) within the BEP.
5. Supplier BIM Assessment Forms:
  - a. Gateway questions.
    - i. Willingness to share information.
    - ii. Data management and process.
    - iii. Training and CPD.
  - b. BIM Analysis.
  - c. BIM project experience.
