Autodesk Policy Update

M2S - Move to Subscription

Please note that the M2S (Move to Subscription) offer will end on 6th May 2020. It means that the coming year will be the last chance to move your maintenance plan to subscription.

Maintenance customers who do not move to subscription before 6th May 2020, will have to pay normal subscription price, if they want to get access to subscription products after May 2020.

Please also note, that the opportunity to change term on an existing M2S agreement from Annual or 2-year to a 3-year term and get extra 10% saving, will end at 6th May 2020 as well.

If you do not keep an active Maintenance plan or Subscription you will lose access to all Maintenance and Subscription benefits. Your software will expire fully or deactivate depending on your license agreement. Software cannot be upgraded at any time. You will also lose access to previous version rights. Please ensure you remain compliant by removing any previous versions etc. **Autodesk perform routine audits to maintain compliancy and fine violations of their license agreement accordingly.**

Make the move to Subscription for less

When you make the switch, **you'll also be able to lock in your discounted price for up to three years** and continue to receive discounted pricing for as long as you renew.
