

Break Down Information Silos to Improve Maintenance Efficiency

REDUCE WORK ORDER DELAYS WITH ACCESSIBLE,
ACCURATE ENGINEERING DRAWINGS AND DOCUMENTATION

Break down information silos between your engineering and maintenance departments by combining Accruent's **Maintenance Connection**, a multi-site computerized maintenance management system (CMMS), with our streamlined engineering document management (EDM) system, **Meridian**.

Together, these solutions empower your organization to improve safety and consistency, and allow you to spend more time producing quality products.

Reduce maintenance delays and improve uptime to efficiently deliver quality products

Prevent on-site design mistakes and lower personnel safety risks

Optimize asset management and extend asset longevity

INCREASE COLLABORATION AND SPEED WORK ORDER COMPLETION

The lack of accurate and readily available asset information limits your ability to safely deliver quality products because of the increased potential for worker injuries and work order delays. Better document and drawing visibility can expedite maintenance work and improve the delivery of field markups to keep asset documentation accurate and reliable.

ENSURE QUALITY PRODUCTS

- Provide maintenance teams with accurate on-site documentation
- Reduce search time for engineering information from hours to minutes
- Avoid production delays due to inaccurate information and unplanned downtime

ENHANCE COMMUNICATION BETWEEN TEAMS

- Ensure disparate teams have access to up-to-date documentation
- Provide shared access to official documentation for both engineers and field technicians
- Gain access to markup tools for comments and edits

STREAMLINE WORK ORDER PROCESSING

- Avoid loss of key information that can cause on-site work order delays
- Search, view and download documents for asset service with a single click
- Access more documents, including maintenance manuals, inspection reports and P&IDs

AVOID SAFETY INCIDENTS

- Make changes to key documents and see automatic updates across the system
- Keep communication open between engineering and field technicians
- Facilitate a seamless handover between engineering and maintenance

Watch the video to discover how our mobile integrated manufacturing solution can help you deliver quality products.

“One of my overarching goals has always been to get documents and prints readily available at my technicians fingertips. The Meridian and Maintenance Connection integration will help streamline our current process.”

- Kyler Keel, CMMS Coordinator, Encore Wire
