

Duration: 3 Days

Prerequisites:

- Access to relevant version of the software. The practices and files included with this guide might not be compatible with prior versions.
- Completion of AutoCAD Essentials.

Course Outline

The AutoCAD® Advanced Course introduces advanced techniques and teaches you to be proficient in your use of the AutoCAD® software. This is done by teaching you how to recognize the best tool for the task, the best way to use that tool, and how to create new tools to accomplish tasks more efficiently.

This course covers:

- Advanced Text Objects
- Working with Tables
- Defining dynamic blocks and attributes
- Outputting and publishing files for review
- Collaboration and automation tools
- Creating, publishing, and customizing sheet sets
- Managing Layers
- CAD Management and System Setup
- Enhancing productivity by customizing the AutoCAD interface
- Using macros and custom routines
