

Duration: 1 Day

Prerequisites: Before using this student guide, students should have working knowledge of 3D design and task-scheduling software. This student guide is designed for new and experienced Autodesk Navisworks users who need to become familiar with the main tools within the software.

Course Outline:

Navis for Novice is a 1-day course which covers the basic set-up and use of Navisworks Manage/Freedom for the first-time user. Explore 3D geometry from multi-disciplinary models through hands-on exercises.

Discover:

- How to get started and the Differences between Revit and Navisworks
- How to take all relevant files and build a federated model
- Navigation and interrogation of your project
- Views, appearance and understanding sets within the software
- Workflows and other Key Functions

Note: there is no clash detection or animator in this course.
